Allowable Subject Matter

1. The following is a statement of reasons for the indication of allowable subject matter: The prior art of record fails to teach the ejector apparatus for claims 1-6 with the lift core, ejector plate between the core and base plate and an adjustment coupling that supports a lower end portion for the lift core and is supported so as to be capable of allowing for the length of the lift core to be increased and decreased from a variety of fixed positions with respect to the ejector plate. The closest prior art, Boskovic, teaches a coupling that is not supported when its length is increased.

2. The following is a statement of reasons for the indication of allowable subject matter: The prior art of record fails to teach the ejector apparatus for claims 7-21 with the lift core, ejector plate between the core and base plate, and a slide path on the ejector plate with 'a slide base movably arranged in the slide path; a guide bush supported on the slide base so as to be pivotable in an inclining direction of the lift core; and a guide rod that serves to force the slide base to slide horizontally by sliding along the guide bush at a time of ascent and descent of the ejector plate, wherein the slide base is equipped with: a slide base main body; and an adjustment coupling constructed such that a lower end portion of the lift core is supported so as to be capable of expanding and contracting in a longitudinal direction of the lift core with respect to the sliding base main body.'
